The afflicted Sun and the rest of the planets on the 2nd house cusp will increase worries about USA's financial conditions and chances of increasing taxes and tolls in many parts of country and some higher level fraud will be unveiled. The same combination occurs in the transit of these planets in the 6th house of USA's chart. This means USA needs to be very careful about territorial attacks; chances of viral diseases will increase. Defense spending will increase. Some banks can become bankrupt, country's reserves may go down and government may appear to be weak in dealing with these problems. Waterborne diseases can also spread. Prices of luxuries like car and other things will go up.

The same situation continues in the Sun's Mesha rashi pravasha chart where in the Simha lagna we have collection of the Mars, the Sun, the Venus and the Ketu with the malefic Saturn aspecting them. Terrorists can do attack on USA ships. There is a possibility of accidents and death of someone in a publishing industry or noted writer. There will be very tough times for Ministry of foreign affairs. Overall shipping/transport industry needs to be very careful.

The Jupiter in the fourth house will be good for land, agriculture, crops, minerals but land or house prices may not increase as the Mars is weak during varsha pravasha. The same Jupiter is with moon in the solar ingress chart and will bring popularity to the government even after some financial tough times the government will take popular actions in the field of health and welfare of the society, but the weak dispositor can bring some harsh criticism of government.

The 5th lord Jupiter in the 10th house does bring reputation, good name and fame for the government but unfortunately the Jupiter also owns the 8th house and the dual results can be felt by the government. There will be trouble to the government in the areas of health care, health insurance, and many other areas including research spending and balancing budgets. There can be some accidents or killing of some eminent film personality. America's international relations with North Korea will be tested again. There will be more problems on that front. America's friends like UK and other countries will support America on international front. Stock markets will be poor. Foreign debt will rise. Most importantly this year also weather in the coastal area will be troublesome. Government will work on immigration reforms but will encounter some sharp resistance. Hence people who are looking for their green cards their process will be slower as usual. There may be some secret enemies and spies with in government. People will give more charities.
