Calendar Explanation

सूर्य सिद्धान्त ॥ तत्त्व गतिवशत्रित्वं यथा दृक्-तुल्यतां ग्रहाः। प्रयान्ति तत्त्ववक्ष्यामि स्फुटिकरणमादरात्॥
वशिष्टा ॥ यस्मिन् पक्षे यत्र काले येन दृग्गणितैक्यम्। दृश्यते तेन पक्षेण कुर्यात्त्रित्यादिनिर्णयम्॥

भास्कराचार्यः। यात्राविवाहोत्सवजातकादौ खेटैः स्फुटैरेवफलस्फुटत्वम्। स्यात्त्रोच्यते तेन नभश्चाराणां स्फुटक्रिया दृग्गणितैक्यकृत्वा॥

We are pleased to release the 2011 calendar based on Hindu dharma shastra and drika siddhanta. This calendar is specially prepared for the Greater Mumbai area, and it may not be applicable in other parts of the world. All time presented here is adjusted for Daylight Saving Time.

The Indian Calendar/Panchangam is used everywhere where Hindu people live. I even see people posting, "I want pambu Panchangam, but I live in the USA and it is not available". The question then arises: "Can Indian Panchangam be used outside of India?". People usually align the Hindu festivals with the English dates based on the Indian calendar. They then think that if an Indian calendar says "Janmasthami" on a certain date, say September 2nd 2010, then it will appear as September 2nd everywhere in the world. The USA is 10:30 to 15:30 hours behind India, so some people will think it will also come the next day in the USA, i.e. September 3rd 2010. They also argue that their family priest in India has told them to celebrate on this particular date and according to him the Indian calendar will apply to all places in the world. This is a completely wrong assumption. If the Earth was flat you can use indian calendar here as sunrise sunset will happen all places equally. We won't have any timezones and the world will have only one time. Using indian calendar abroad means going against what Surya Siddhanta has taught us, what Maharishi Vashistha has taught us and what Bhaskaracharya has taught us. They all say one thing prepare the panchangam based on the longitude, latitude of the place you live. You cannot import calendar from other countries or places.

The English date and day (Sunday, Monday, Tuesday etc..) changes at midnight; whereas the Hindu date (or Tithi) and day does not change at midnight. Hindu days change at Sunrise. All days are from one Sunrise to another Sunrise. Sunday will start at one Sunrise and end at the next Sunrise. The Hindu date (or Tithi -- depending on the position of the Sun and Moon at any given time) changes as celestial bodies move. It can change anytime between two Sunrises. That is to say that if Prathama Tithi ends today at 23:02 it does not mean that Dwitiya Tithi will end tomorrow at the same time. It can end at 18:00, 18:09 or 28:27 (anytime after 24 means after midnight but before the next Sunrise).

Tithi: In the lunar calendar the Moon takes a month for each revolution around the Earth. The lunar calendar is divided into two groups called Pakshas. The first one is called Krishna Paksha (or dark fortnight) which is when the Moon is waning. The second is called Shukla Paksha (or bright fortnight) which is when the Moon is waxing. Each Paksha is divided into 15 Tithis. The first 14 Tithis are the Sanskrit numbers from 1 to 14 (Prathama, Dvithiya etc). The 15th Tithi of Shukla Paksha is Poornima (full Moon) & the 15th of the Krishna Paksha is Amavasya (Moon is not visible as it is closest to the Sun). So a lunar month consists of 30 Tithis and each Tithi then corresponds to the time taken by the Moon to move 12 degrees with respect to the Sun. Krishna Paksha Tithis are in the darker color and Shukla Paksha Tithis are mentioned in the red color.

Nakshatra: There are 27 Nakshatra (constellations) in the Zodiac. A Nakshatra is the zodiac constellation in which the Moon is found on the particular day. Nakshatras are in *italics*.

Timings listed in the Calendar: The times listed after a Tithi & Nakshatra are the times at which the Tithi or Nakshatra ends. The Panchanga uses the Vedic definition of a day, i.e., a day starts with Sunrise and ends with the subsequent Sunrise. Thus, a Tithi with a time of 29:00 indicates that the Tithi ends before the next Sunrise. According to the western calendar, this means that the Tithi ends at 5:00 AM (29:00 – 24:00) on the next day. Hence 24:00 means 00:00 hours of the next day, 25:00 means 1:00 AM of the next day, 29:00 means 5:00 AM of the next day. This is standard for any Panchangam. The time for Sun's samkramana is when Sun will enter that rasi or sign on that day. e.g. Makara 4:36 means Sun is entering Makara rasi at 4 hour 36 minute. All other times are the ending times.

How festivals are determined?

The usual rule to observe a festival for a particular day, check which Tithi prevails at that Sunrise. Each festival has different rules of observance. For example: Ganesh Chaturthi. Sankathara (Sankshathi Chauth) Chaturthi, Janmashtami, Mahashivaratri, Karwa Chauth, etc... For example Ganesh Chaturthi has to be observed when the Chaturthi Tithi is observed during the 8th/15th part of the dinmana or the 3/5th part of the dinmana. The dinmana is the difference between local Sunset and Sunrise on the same day. If Chaturthi is not prevailing during that period then take the second day. Likewise for the Karwa Chauth and the Sankathara Chaturthi the Chaturthi Tithi must be prevailing during the moonrise time, if it does not prevail then take the day where it prevails during the sunrise. Rules to determine Shradha Tithi are different.

For example, if one Tithi is observed at moonrise in India it may or may not exist during moonrise on the same day in a different part of the world. It may be very well observed on the previous day if you are in America or the next day if you are in Japan, Fiji, Australia and other countries. America is behind India in terms of time. To arrive at the time in India we need to subtract the time from Indian time and hence festivals could arrive a day early in USA but not later. For example if a total lunar eclipse is visible in India at 5:00 AM it will happen on the previous day in the USA. For these reasons Indian Panchangam you buy in India cannot be used outside of India.

Uttarayana / Dakshinayana: The season occurs based on tropical Sun (without ayanamsha). This is due to Earth's tilt of 23.45 degrees. The Earth circles around Sun with this tilt. When the tilt is facing the Sun we get summer and when the tilt is away from the Sun we get winter. Because of this tilt it seems like the Sun travels north and south of the equator. This motion is called Ayana Gati. The motion of the Sun moving to north is called Uttarayana – The Sun is moving towards North and Dakshinayana the Sun is moving towards South. This motion of the Sun moving towards the north is called Uttarayana. When it is moving towards the south it is called Dakshinayana. This causes rise to seasons. They are dependent on equinoxes and solstices.

There is a common misconception that Makar Samkranti is the Uttarayana. This is because at one point in time Sayana and Nirayana Zodiac were same. Every year equinoxes slides by 50 seconds due to precision of equinoxes, giving birth to Ayanamsha and causing Makar Samkranti to slide further. As a result if you think Makar Samkranti is Uttarayana then as it is sliding it will come in June after 9000 years. However Makar Samkranti still holds importance in our rituals as a Samkranti. All Drika Panchanga makers will use the position of the tropical Sun to determine Uttarayana and Dakshinayana. Hence January 14th isn't Uttarayana. Actual Uttarayana occurs on December 21st/22nd of every year. For more details please visit <http://www.mypanchang.com> or write to shastriji@mypanchang.com.

About myPanchang.com: myPanchang.com is the most popular website site that provides the most accurate panchangam in English and various Indian languages. for over more than 394 cities all over the world based on highly accurate driga ganitha or thiruganitha. Most temples in the world rely on myPanchang.com for accurate Panchang data and festival observance times. Please visit myPanchang.com for more details. If you have any questions about confusion about any festival please contact myPanchang.com

Pongal coincides with the festival Makara Sankranti celebrated throughout India. Pongal in Tamil means "boiling over or spill over." The boiling over of milk in the clay pot symbolizes material abundance for the household. Thai Pongal, celebrated at harvest time, is traditionally intended to thank the Sun God and farmstead livestock that helped create the material abundance.</p>				1 New Year Shani Pradosham Margasira Kr Paksha Dvadashi 15:04 Anuraadha 25:56+

<p>Ratha Saptami is an important Hindu festival associated with Lord Surya (Sun God). Lord Surya riding a chariot driven by seven horses is worshipped on this day. It is also known as Magh Saptami or Magha Saptami, Jayanti or Jaya Saptami. Most temples in India will have Aruna Prashna parayanam on this day from early morning hours. Worshipping sun bestows health and cure several diseases.</p>		<p>Masa Shivaratri</p> <p>Pausha Kr Paksha Chaturdashi 30:26+ P.shadha 10:51</p>	<p>Amavasya Tarpanam Amavasya full night U.shada 12:39</p>	<p>Amavasya 08:00 Shravana 14:48</p>	<p>Magha Sh Paksha Prathama 09:54 Dhanishta 17:15</p>	<p>Dvitiya 12:06 Shatabhisha 19:58</p>

The earth circles around sun with this tilt. Because of this tilt it appears like the Sun travels north and south of the equator. This motion of the sun is called Uttarayana – The sun is moving towards North and Dakshinayana the sun is moving towards South. Actual Dakshinayana is not when sun enters karka, but when its always measured based on Sun's declination – Kranti.</p>

31 Shravana Sh Paksha Prathama 21:47 Aslesha 28:16+ Shukra Astha	The famous Ratha Yatra, the Festival of the Chariots, is held in Puri on the second day of the bright fortnight of the Ashada. On the festival day, the deities Sri Jagannatha, Balabhadra and Subhadra along with Sudarshana are taken out of the big temple. The Ratha Yatra symbolizes universal brotherhood, equality and inclusiveness of highest order. The chariot is a metaphor. Sri Jagannath, as the soul is seated in the body chariot. Liberation is the goal.				1 ● Amavasya Tarpanam Jyeshtha Kr Paksha Amavasya 14:23 Aardra 23:01	2 Ashaadha Sh Paksha Prathama 13:23 Punarvasu 22:34

Lord Krishna's birthday is celebrated in different ways in different parts of India. The next day of Krishna's birthday is celebrated in the state of Maharashtra (India) as a dahikala. Where group of youngsters – Govinda go from street to street and they try to break a clay pot filled with milk, yogurt. This year during the Yajur upakarma there is a shukra astha and hence upakarma for the newly given yagnopavita (poonal) cannot be done. In case of doubt please follow your sampradaya.

SUN	MON	TUE	WED	THU	FRI	SAT
<p>Tripuri poornima or Tripurari Poornima derives its name from Tripurari - the foe of the demon Tripurasura. Lord Shiva killed Tripurasura on this day who had conquered the whole world and defeated the gods. He also created three cities in space, together called "Tripura". The killing of the demon and destruction of his cities overjoyed the gods and they pronounced the day as a festival of illuminations. This day is also called "Dev-Diwali" - the Diwali of the gods.</p>		<p>1</p> <p>Chhath (Bihar) Surya Shasthi Skanda Shasthi</p> <p>Kartika Sh Shashthi 10:06 P.shadha 10:36</p> 	<p>2</p> <p>Saptami 09:56 U.shada 11:05</p>	<p>3</p> <p>Gopa Asthami</p> <p>Ashtami 10:31 Shravana 12:18</p>	<p>4</p> <p>Navami 11:46 Dhanishta 14:08</p>	<p>5</p> <p>Dashami 13:34 Shatabhisha 16:29</p>

Vishnu Sahasranama is chanted during the period. Other important mantras chanted are those dedicated to Goddess Lakshmi. The most popular offering made to Lord Vishnu in the month is Moong dal. There is a belief that worshipping Lord Vishnu on a single day during Dhanurmasam is equal to worshipping him for thousands of years.</p>

SUN	MON	TUE	WED	THU	FRI	SAT
<p>Khgoliya Siddhanta: The earth has a tilt of 23.45 degrees. The earth circles around sun with this tilt. Because of this tilt it seems like the Sun travels north and south of the equator. This motion of the sun moving north is called Uttarayana. The Dakshinayana is the sun is moving towards South. Actual Uttarayana is not when sun enters Makara, but its always measured based on Sun's declination – Kranti this also coincides with Sun entering into Tropical (Sayana Makara not Nirayana) Makara rasi.</p>				1	2	3
